Feb, 2026 - Present
Parul University

PROJECTS

CartWise - Real-Time Grocery Price Comparison Web App

- Built full-stack web app using Next.js, React, Tailwind CSS, ShadCN UI, TypeScript, Google Genkit AI.
- Integrated real-time grocery prices from Blinkit, JioMart, Zepto, BigBasket, and Instamart.
- Developed AI-based recommendation system to suggest complementary products.
- Designed responsive UI for seamless shopping across devices.

ClassmateAI - AI-Powered Interactive Learning Assistant

- Created educational web app with Next.js, React, Tailwind, ShadCN UI, Genkit, Google Gemini AI.
- Implemented features like lesson summarization, Q&A, and image analysis for students/teachers.
- Designed modular UI with collapsible sidebar, toast notifications, and dashboards.
- Enhanced scalability and performance through clean project structure.

Language Translator - Android Speech Translation App

- Developed mobile app using Java, Android SDK, Google ML Kit, Speech Recognition API, Firebase.
- Enabled real-time speech-to-text translation across multiple languages.
- Integrated Firebase backend for app services and managed runtime permissions.
- Built simple, interactive UI with modern Material Design.
